        conducting SmartSELECT searches.

    ******************************************************************
    *                                                                *
    * The CA roles and document type information have been removed from *
    * the IDE default display format and the ED field has been added,  *
    * effective March 20, 2005.  A new display format, IDERL, is now   *
    * available and contains the CA role and document type information. *
    *                                                                *
    ******************************************************************

    Structure search iteration limits have been increased.  See HELP SLIMITS
    for details.

    REGISTRY includes numerically searchable data for experimental and
    predicted properties as well as tags indicating availability of
    experimental property data in the original document.  For information
    on property searching in REGISTRY, refer to:

    http://www.cas.org/ONLINE/UG/regprops.html
